## **Principal's Comment:**

Over the past few weeks and days, I have attended a workshop day, visited some schools and had our school curriculum and practice challenged. Why are we teaching a certain way? What are we preparing our students for? Are we creating a learning space that works on the skills our students require to be successful in their future lives? All very valid and interesting points. My personal favourite is "just because we have always done it like this, doesn't make it right!"

Strengthening our local curriculum is a Ministry initiative and it is timely that we begin looking at our class routines and teaching methods to ensure we are providing the best possible future for our students.
